— Safe Margin

• All critical elements (text, images, graphics, logos, etc.) must be kept inside this blue line to avoid trimming.

— Trim Line

• This is the actual cut of the final design. Any images and text beyond this line will be trimmed.
• We do not recommend having borders due to shifting in the cutting process, which may cause borders to appear uneven.

— Bleed Area

• Design all artwork to the edge of the black outline (we require 1/8\"/>

Design in CMYK

• All designs should be provided in CMYK format. In the case that RGB files are provided, please note that colors may shift during manufacturing.

Outlining/Rasterizing Fonts and Strokes

• Outline/Rasterize all live fonts and strokes before saving. This ensures your artwork translates as designed during the manufacturing process.

Check your Resolution

• All designs should be created with at least 300 DPI to ensure the highest quality print during the manufacturing process.
